EFFECTS OF TROPICAL STORM “SENDONG” (WASHI)
PRESIDENTIAL GUIDANCE RE-EFFECTS OF TS SENDONG, 17 DEC 2011
As of 21 December 2011, 06:00 PM

1. The number of casualties is alarming. If USEC Ramos had a 3-day lead time to disseminate warning advisories to Hinatuan, Surigao del Sur re-landfall of TS “Sendong”, there is a need to advance more than 3-day warning to mitigate the impact of incoming typhoons or natural calamities. DILG in tandem with DOST should look into the mitigation aspect of areas with high exposure to disaster risks, and employ prioritization as to their potential impact for disasters.
2. **Consideration should include long-term mitigation measures to address siltation of rivers, mining and deforestation.**
3. **These high risk areas should be identified for human settlements and development be relocated into safe habitation.**
4. **Assets to include military response capabilities can be transferred before the 3-day warning whenever a typhoon will affect communities at risks. A review of the protocols to include maintenance and transporting costs of these air, land, and maritime assets should be undertaken.**
5. Schedule a Presidential inspection and visit to affected communities in Cagayan de Oro City and Iligan City on Tuesday, 20 December 2011
6. Mandatory meeting or formal conference will be conducted by the Council and the Office of the President with LGUs for threatened areas due to incoming typhoons and avoid water-related disasters. This is to prevent the people react and will include calibration of warning. For DILG to look into the identification or designation of focal point/person among LGUs likely to be affected by natural calamities as OPR decision-maker.
7. There is a need to come up with a Crisis Manual for Natural Disasters. The thirteen (13) barangays reported in Cagayan de Oro City to be situated along the two (2) swollen river systems which river beds already silted are like “disaster waiting to happen”, if the 93 bodies recovered by the AFP are officially confirmed already as casualties.
8. DPWH to render an Assessment Report on Monday, 26 December 2011 on the on-going reconstruction of the main roads in Ilocos Norte particularly Pagudpud which was affected by landslides due to monsoon rains. This will also include the diversion roads, if any.
